

REMARKS

In response to the Restriction Requirement mailed March 23, 2004, applicants elect Claim Group I (Claims 1-33, 67-73, 75-80 and 82-88). Applicants further elect the polynucleotide SEQ ID NO:64. Election is without traverse. Applicants note that the claims have been amended so that they are directed to isolated nucleic acid molecules that encode a (-)- camphene synthase (e.g. the isolated nucleic acid molecule of SEQ ID NO:64) and that hybridize to the portion of SEQ ID NO:3 extending from nucleotide 1560 to nucleotide 1694 under defined hybridization and wash conditions. The hybridization and wash conditions can be found in the specification in Example 12. The same hybridization and wash conditions have been introduced into independent Claim 67. New Claims 91-96 have been added. Support for the hybridization conditions recited in new Claims 91 and 92 are found in Example 12. Support for new Claims 93-96 are found, for example, in the first paragraph of page 13, and the second paragraph on page 19 of the specification. Applicants submit that no new matter has been entered by these amendments.

Respectfully submitted,

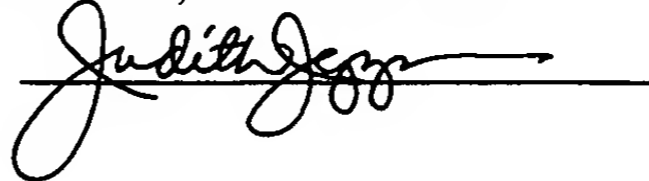

CHRISTENSEN O'CONNOR
